DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 66-105, drawn to a composter for waste material.

Group II, claim(s) 106-145, drawn to a vertically-oriented composter.

Group III, claim(s) 146-152, drawn to a method for composting waste material.

2. Where the group of inventions is claimed in one and the same international application, the requirement for unity of invention referred in rule 31.1 shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression "special technical features" shall mean those technical features that define a contribution which each of the claimed inventions considered as a whole, makes over the prior art. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature in each group is the size reduction means used to "grind" the waste material in the composter. This element cannot be a special technical feature under

PCT rule 13.2 because the element is shown in the prior art. U.S. Patent 5,534,042 teaches a rotary vane used to grind and agitate the organic matter in the treatment tank and furthermore indicates that this feature can be used for organic material consisting of left over food and fish bones. Accordingly, the special technical feature linking the inventions, the size reduction means mounted on a rotatable shaft, does not provide a contribution over the prior art and no single general inventive concept exists. Therefore, the restriction is appropriate.

3. A telephone call was made to Michael Bartol on 03/18/2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
